

# PUBLIC NOTICE FROM THE WISCONSIN DEPARTMENT OF TRANSPORTATION

## PROJECT DETAILS

- Repairs to bridges on I-94 will occur at the seven locations shown below between County P and County F from spring 2016 to fall 2016.  
**Bridge repairs include:** Concrete deck overlays, joint replacements, approach slab replacement, guardrails.  
**Reason for Project:** To lengthen the life of the existing bridges.
- There will be multiple work zones throughout the project area. Freeway shoulders will be temporarily widened in the work zones to shift traffic around the work zones. Travel lanes will be narrowed to 11'. **Note:** Trucks will not be allowed to use the temporarily widened lanes.
- In work zones, freeway shoulders will be reduced to 1 foot width.
- The freeway speed limit will be reduced to 55 MPH in the work zone.
- I-94 will remain open to traffic, but there will be lane closures allowed during night time hours. There may also be night time ramp closures. However, all lanes on I-94 will remain open throughout holiday weekends and Badger Football home games.
- Additional work will occur over I-94 at WIS 164 and County F but the time frames will be staggered to allow use of alternate routes.

## I-94 Bridge Repair Work Starting SPRING 2016
